

Six Way Calling

Allows you to have a small conference

How to use:

Pick up handset and listen for dial tone.1

Press *41

Listen for stutter dial tone.

Now dial the number of the first party.

To add other parties:

Depress the "switchhook" for about a second.

Then dial the number of the next party you wish to add (speed calling codes may be used if you have this feature)

When the party answers, you may talk privately before completing your conference connection

With your new party on the line, depress the "switchhook" for a second to add the holding party. Your conference call is now in effect. If for some reason the call to the new party is not completed, depress the "switchhook" twice to get back to your conference.
